Experience History:

My career started at Kaar Technologies, India, Pvt. Ltd. Around 5 years back, when I joined here as a fresh graduate from college. I'm currently working at Riyadh at my Client Site for Saline Water Conversion Corporation as a full-stack SAP Analytics Consultant. The Roles that I have taken in Kaar required skills to handle multiple tasks simultaneously and new technologies need to be expertized in short period. So, there would be many roles that I have mentioned below, that would be overlapping, where I had given my additional efforts to take up multiple projects from customers from various regions such as Gulf, US and UK and have ensured attention to all of them simultaneously.

Role: SAP Analytics Consultant (SAP Analytics Cloud, SAP BW/4 HANA, Analysis for Office, Native HANA Development)

Project Type: T&M Support (On-Site at Riyadh)

Period: March 2022 – Present (Saline Water Conversion Corporation)

- Handles incidents related to Analytics Stream by tracing them through Solution Manager.

- Involves in Development of Live SAC Dashboards related to Costing, Performance, Green Initiative, etc. and the backend modeling for the same with usage of Hierarchies.

- Development of SAP BW/4HANA Process Chains to automate the loading of hourly reports and support issues related to loading in existing process chains.

- Support issues related to Analysis for Office reports developed over BEx Queries based on data from BW/4HANA Info providers and develop if any new requirements are requested by the customers, which also involves end to end BW Modeling and Standard Content Activations.

- Creation of SAP Analytics Cloud Roles and Maintenance of Security features.

- Creation of Connections and maintaining the version of Reports and Dashboards by taking care of transport activities and co-ordinate with Basis for the same.

Role: SAP Analytics Consultant (SAP Analytics Cloud, SAP BW 7.5, Web Intelligence, Native HANA Development)

Project Type: Implementation and T&M Support

Period: July 2021 – February 2022 (Saudi Industrial Development Fund)

- Participated in requirement gathering sessions with client to understand the business requirements for real-time analytical solutions

- Managed the development and support of the objects

- Involved in creation of HANA information views (attribute, analytical and calculation views – graphical) containing Input parameters, Variables and calculated columns.

- Ensured optimal performance in the developed HANA Models

- Involved in creation of 50 Web Intelligence Reports for CRM and CML Modules and supported Lumira Dashboard Developments.

- Designed and Developed 3 Dashboards using SAP Analytics Cloud Dashboards for Management Level Users using both Live and Import Connections.

- Proposed new design ideas for the development of SAP Analytics Cloud Dashboards and using Planning Models for Manual input of Data.

- Creation of SAP Analytics Cloud Roles and Maintenance of Security features.

- Creation of Connections and maintaining the version of Reports and Dashboards by taking care of transport activities and co-ordinate with Basis for the same.

- Resolved issues in BW Process chains during data upload failures.

Role: SAP Analytics Delivery Team Support (SAP BW on HANA/SAP BPC Optimized for S/4HANA, Analysis for Office)

Project Type: T&M Support (Yorkshire Water via Hexaware Pvt. Ltd.)

Period: Sep 2019 – May 2021

- Ensured that the Support tickets in BW on HANA, BPC Optimized for S/4 HANA and Web Intelligence raised against Analytics Stream are resolved.

- Ensured the Smooth Functioning of S/4 HANA System

- Resolved Issues during Upgrade Activities from 1609 to 2020 version.

- Adhered to SAP Standards and have maintained the recorded the Object Movements in Solution Manager.

- Development of new Planning sheets using Analysis for Office and Input- enabled Bex Queries and provide support for the existing Planning sheets.

- Controlling the Work Status in BPC Optimized for S/4 HANA Web tool.

- Supported the existing 60+ reports developed in Web Intelligence based on CDS Views.

- Supported for Upgrade activities and Redbook activities after upgrade

- Investigated System failures and Performance issues.

- Worked with Security Team to create User Roles and support for User Access issues related to BI Reports.

Role: SAP Analytics Application Management Services Support Consultant

Project Type: Ad-hoc Support

Period: Jan 2019 – Aug 2019 & Jan 2021 – Present (Shared Support for Gulf and UK Clients)

- Development of new reports and dashboards on Ad-hoc basis and resolve issues raised on existing developments related to Analytics Module.

- Supported for SAP BW, BEx Query Designer, Web Intelligence, SAP Lumira, SAP Analytics Cloud and Power BI Dashboard related issues.

- Development of SAP Design Studio Dashboards and provided support for the same.

- Provided solution design for Greenfield implementation of Analytics for new Customers as a part of Pre-Sales Activity.

- Simultaneously supported customers directly from MENA and UK Regions.

- Resolved issues in Universe Connections created in Information Design Tool.

- Development of Project Planning Models in BW and Standard BPC Transformation and Report Creation.

Role: SAP Analytics - Technical Developer (SAP Analytics Cloud, SAP BW 7.4, Analysis for Office, Native HANA Development)

Project Type: Implementation

Period: Nov 2017 - Dec 2018 (Saudi Aramco Mobil Refinery, KSA) &
**   May 2021 - June 2021 (Mitsubishi Electric Trane US)**

- Development of SAC Sales Dashboards and SAC SD Reports.

- Development of HANA information views (attribute, analytical and calculation views – graphical) containing input parameters, variables and calculated columns.

- Creation of Security Roles for the users and taking care of transport activities.

- Creation of Web Intelligence and Xcelsius Reports based on MM and HR Modules.

- Development of Lumira Dashboards for PM Module.

- Development of BW Models and BEx Queries in MM, HR and PM Modules.

- Creation of Process Chains to automate data loads.

- Creation of Training documents using SAP Workforce Performance Builder.

- Assignment of Reports and Dashboards to end users in SAP Enterprise Portal.

Awards and Recognitions:
